Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-19, 21-30 and 32-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamiya (4,672,534).

As per claims 1 and 5, Kamiya discloses a method, comprising the steps of:

Executing a first test for at least one signal semiconductor device;

Preparing execution of a second test...;

Processing test data resulting from the first test; and

Executing the second test concurrently with the processing of the test data. (See col. 1, lines 47-64 and col. 6, lines 10-19).

As per claims 2-3 and 8-11 Kamiya further discloses the mixed signal semiconductor testing is performed by a single processor (CPU1).

As per claim 4, Kamiya further discloses identifying hardware elements corresponding to the second test; and

Configuring the hardware elements corresponding to the second test. (See col. 1, lines 60-64).

As per claim 6, Kamiya further discloses wherein the first and second tests are configured in an interpreted software language (col. 2, lines 26-33).

As per claims 12-19, 21-24, 25-30 and 32-34, these claims are rejected under similar rationale as set forth in claims 1-6, 8-11.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7, 20 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamiya (4,672,534).

The teaching of Kamiya had been discussed above. Kamiya does not disclose that the the interpreted software language is interactive test pascal. However, it would have been obvious design choice to a person skilled in software art, at the time the invention was made, to use software language as an interactive test pascal as desired when needed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday to Friday.
